A drops of the guanythine (Ismelin, GBS) eye
drop with a sympatholytic effect which on local ap-
plication causes lowering of the intraocular tension in
the normal eyes as well as in eyes affected with closed
glaucoma or secondary glaucoma. The effect might be
due to a decrease in the outflow resistance of the
aqueous humor. Its advantage over pilocarpine con-

DESCRIPTORS: Vibration, *Sound transmission,
Acoustics, *Reverberation.

An exposition of reverberation phenomena in enclosed
spaces is given and hence the characteristic bending of
reverberation curves is predicted. The slope at the
commencement of such a curve is shown to be pro-
portional to the weighted arithmetic mean of the
damping factors of all the relevant natural vibrations.
